

Use these colour descriptions for breeds which DO NOT have Specific Breed colour descriptions. Eye colour may differ from the norm in some breeds, please refer to the individual breed standard for additional guidance.

(Parti-Colour Division in Persian)

ANY COLOUR/PATTERN & WHITE

Coat conforms to the established colours and patterns with the addition of white. As a preferred minimum (unless otherwise stated in the breed standard), the cat should have white feet, legs, underside, chest and muzzle. An inverted 'V' on the face is desirable. Nose leather and paw pads conform to the established colour standards. Eye colour is gold to copper, blue, or odd-eyed (one blue and one gold/copper eye with equal colour depth). **EXCEPTIONS:** 1. Silver tabby and white, silver patched tabby and white, blue silver tabby and white, blue silver patched tabby and white may also have green or hazel eye colour. These colours in odd-eyed shall have one blue and one green, hazel or gold to copper eye with equal colour depth. 2. Shaded silver and white, chinchilla silver and white, shaded golden and white, chinchilla golden and white may also have green, blue-green, or odd-eyed where one eye is green or blue-green and the other is blue with equal colour depth.
